18Ah/Led

48V LITHIUM BATTERIES

Top of the range **48v Lithium battery & charger** with 5 year warranty suitable for all 2 seater golf buggies.

- The 48V 55Ah lithium buggy battery pack is designed to fit in the battery compartment of a 2 seater golf buggy. Simple modification to wiring may be required. Connection is with the existing connections, but varies slightly according to the model of buggy. Check when ordering and we will supply the correct electrical connectors and mounting brackets.
- The lithium battery is long lasting. It is designed for 10,000 charge/re-charge cycles and comes with a 5 year warranty. It will last longer than the equivalent lead-acid battery, so is cheaper in the long run.
- Battery, with battery management system (built-in) and state of charge display (external)
- Electrical connector (state brand of golf buggy when ordering and if you want the charger on-board or off-board)
- Bluetooth system built in as standard.
- We as standard have on all our batteries a huge capacity 'BMS' (Battery management system) that protects the battery cells and is a **200ah capacity**... no one else offers this option...we are 'as standard'... (our 36v option is 150ah)
- Faster acceleration and torque with 200ah constant & 400ah peak.
- 5 protections A grade cells-Cell holder-Laser Welding-Straps.
- No Maintenance-No Corrosion-No Labour Cost

GOLF BUGGIES

For 30 years we have sold UK made **single seater golf buggies**. Please contact us to discuss your particular needs and suitability, options available and build time as they are made to order in UK.
